

# Table of Contents

## Session A: Reinforced Concrete Structure

<b>Investigation of Shear-Dominated Response of Multi-Story RC Structural Walls with Eccentric Openings</b> .....	1
<i>Rafik Taleb, Masanobu Sakashita, and Susumu Kono</i>	
<b>Analytical investigations on the seismic response of an RC box-type wall building structural system</b> .....	11
<i>Kyung Ran Hwang and Han Seon Lee</i>	
<b>Seismic Capacity Evaluation Of R/C Frame With URM Infill Focused On Diagonal Structure Mechanism</b> .....	21
<i>Ho Choi, Ki-Woong Jin and Yoshiaki Nakano</i>	
<b>Study on Sliding Shear Failure of Reinforced Concrete Bearing Wall</b> .....	31
<i>Masanori Tani, Susumu Kono and Hiroshi Fukuyama</i>	
<b>Prediction of Shear Strength for Reinforced Concrete Short Columns Using High Strength Material</b> .....	41
<i>Yi-An Li and Shyh-Jiann Hwang</i>	

## Session B: Steel Framed Structures

<b>Effects of Static Loading Sequences on Testing Capacity of Braces in Concentrically Braced Steel Frame System</b> .....	51
<i>Chui-Hsin Chen and Huai-Kuo Hu</i>	
<b>Collapse Capacity of Steel Moment-Resisting Frames with Hysteretic Energy Dissipating Systems Designed According to ASCE 7-10</b> .....	61
<i>Hyung-Joon Kim, Dong-Hyeon Shin and Jin-Young Park</i>	
<b>Seismic behavior of self-centering designed Concentrically Braced Frame</b> .....	69
<i>Chin-Tung Cheng and Chia-Yi Yen</i>	
<b>Numerical Analysis of Collapsing Behavior for Multi-Story Steel Moment Frames Considering Strength Degradation by Local Buckling</b> .....	79
<i>Seiji Mukaide, and Motohide Tada</i>	
<b>Seismic Responses and Finite Element Analyses of A Novel Steel Dual-Core Self-Centering Braced Frame</b> .....	87
<i>Chung-Che Chou, Ying-Chuan Chen, Pham Dinh Hai, Alexis Rafael Ovalle Beato, Tsung-Han Wu</i>	

## Session C: Reinforced Concrete Members

<b>Lateral-Force Resisting Mechanisms of Flexure-Dominant Multi-Story Structural Walls with Soft-First-Story</b> .....	95
<i>Yuki Idosako, Masanobu Sakashita, Xiaoshan Feng and Minehiro Nishiyama</i>	
<b>Effect Of Axial Compression On Shear Strength Of Reinforced Concrete Columns With High-Strength Steel And Concrete</b> .....	105
<i>Yu Chen Ou and Dimas Pramudya Kurniawan</i>	
<b>Punching Shear Design Method of KCI 2012</b> .....	115
<i>Kyoung-Kyu Choi and Hong-Gun Park</i>	
<b>Seismic Performance of Pre-tensioned Beams Using Steel-Fiber Reinforced Concrete</b> .....	121
<i>Mitsuya Mori, HyeongJae Yoon and Minehiro Nishiyama</i>	
<b>Analytical Model For Load-Displacement Curve Of Slender Masonry Piers</b> .....	131
<i>Yi-Hsuan Tu, and Tsung-Hua Chuang</i>	

## Session D: Reinforced Concrete Connections

<b>Prediction of Fracture of Steel Moment Connection by Cyclic Loading with Varying Deformation Amplitude</b> .....	141
<i>Kouhei Takatsuka, Keiichiro Suita and Tsuyoshi Tanaka</i>	
<b>Prediction of Low-Cycle Fatigue Fracture of Welded Seismic Steel Moment Connections: A Continuum Damage Mechanics Approach</b> .....	151
<i>Jae-Hoon Kim, Cheol-Ho Lee, Dae-Kyoung Kim and Dong-Guen Lee</i>	
<b>Strength of Self-Drilling Screw Connection used in Steel Framed House Systems Nominal Strength of Hold-Down Component Connection</b> .....	161
<i>Atsushi Sato, Takuya Toriyama, Hisayuki Okada, and Tetsuro Ono</i>	
<b>Self-centering of Post-tensioned Column Base</b> .....	171
<i>Cheng-Chih Chen, Huan-Wei Lin and Rung-Shiuan Tsai</i>	

## Session E: Reinforced Concrete Connection

<b>Bi-Directional Lateral Behavior of Post-Tensioned Corner Slab-Column Connections .....</b>	179
<i>Thomas Kang</i>	
<b>Confinement Efficiency of High Strength Steel Fiber in High Strength Concrete.....</b>	189
<i>Wen-Cheng Liao, Yao-Jen Kuo and En-Jui Liu</i>	
<b>Structural Behavior of RC Beam-Column Assemblages Subjected to Cyclic Loading .....</b>	197
<i>Jung-Yoon Lee, Jong-wook Park, and Mohamad Y. Mansour</i>	
<b>Seismic Strengthening with a New Steel Device for R/C Exterior Beam-Column Joints.....</b>	207
<i>Yuebing LI, Yasushi Sanada, Yasuhiro Watanabe and Takuya Tomonaga</i>	
<b>Strut-and-tie Models for Bond Anchorage .....</b>	217
<i>Sung-Gul Hong</i>	

## Session F: Seismic Device / Performance /Risk Analysis

<b>Hybrid Mass Dampers for Reducing Wind Responses of Buildings.....</b>	225
<i>Kyung-Won MIN, Jae-Sung Heo, Young-Wook Kim</i>	
<b>A Leverage-Type Stiffness-Controllable Mass Damper for Vibration Mitigation of Structures.....</b>	231
<i>Shih-Yu Chu, Lyan-Ywan Lu, Shih-Wei Yeh and Chih-Hua Peng</i>	
<b>Load-Drift Relationship of Dowel Bar in Reinforced Concrete Member .....</b>	241
<i>Susumu Takahashi, Eiji Anoda, Toshikatsu Ichinose</i>	
<b>An Experimental Study on Ductile Behavior of Diagrid Structure .....</b>	251
<i>Yong-Wan Kim, Myoung-Kyu Lee, Tae-jin Kim, and Byung-Min Cho</i>	
<b>Response-Based Probabilistic Risk Assessment Of Nuclear Power Plants .....</b>	259
<i>Yin-Nan Huang, Ying-Hsiu Shen, Chang-Ching Chang and Ching-Ching Yu</i>
